Output power listed is rated conducted. This device must be restricted to work related
operations in an Occupational/Controlled RF exposure Environment, not exceeding a
maximum transmitting duty factor of 50%. All qualified end-users of this device must have the
knowledge to control their exposure conditions and/or duration to comply with the
Occupational/Controlled SAR limit and requirements. A label, as described in this filing, must
be displayed on the device to direct users to specific training information for meeting
Occupational Exposure Requirements. Body-worn operating configuration is limited to the
specific belt-clip and accessory configurations as documented in this filing. End-users must be
informed of the body-worn operating requirements for satisfying RF exposure compliance.
The highest reported SAR values for head and body-worn accessory transmission exposure
conditions are 2.31 W/kg and 3.59 W/kg, respectively when operating at 50% duty cycle.

EF: This device may contain functions that are not operational in U.S Territories except as noted in the filing. This grant has extended
frequencies as noted in the filing and Section 2.927(b) applies to this authorization.

ES: This equipment is capable of supporting a minimum data rate of 4800 bits per second per 6.25 kHz of channel bandwidth.
